

## **About this Role**

We are seeking a detail-oriented and collaborative individual to join our team as a DAIS Intern. This role involves designing, developing, and maintaining robust data pipelines and reporting solutions that support business decision-making. The successful candidate will work closely with stakeholders to deliver accurate, timely, and insightful data visualisations and reports.

---

## **Who are you**

You are a motivated and analytical professional with a foundational understanding of data analysis and reporting. You enjoy solving problems, improving processes, and working collaboratively across teams. You are committed to ensuring data accuracy and are eager to grow your skills in a dynamic, data-driven environment.

---

## **What you will do**

- Design, develop, and maintain data pipelines and ETL processes to support reporting needs.
  - Collaborate with business analysts and stakeholders to gather requirements and translate them into technical reporting solutions.
  - Build scalable data models for reporting and analytical purposes.
  - Create interactive dashboards, reports, and visualisations using tools such as Tableau, Power BI, Qlik or similar platforms.
  - Maintain and enhance existing databases, queries, and stored procedures to improve reporting performance.
  - Ensure data quality, consistency, and accuracy across all reporting platforms.
  - Automate reporting processes to improve efficiency and reduce manual workload.
  - Troubleshoot and resolve data-related issues, ensuring timely delivery of accurate reports.
  - Document development processes, data pipelines, and reporting solutions for future reference and maintenance.
  - Stay informed about emerging trends and technologies in data analytics, reporting tools, and development practices.
- 

## **What skills you need**

- Bachelor's degree (B.Tech) in Computer Science
- Foundational experience in data analysis, reporting, or software development within a data-driven environment.
- Proficiency in SQL, including writing complex queries, optimising database performance, and creating stored procedures.
- Experience with data visualisation and reporting tools such as Tableau, Power BI, or QlikSense.

- Familiarity with cloud-based data platforms, particularly Google Cloud, is advantageous.
  - Strong problem-solving skills and attention to detail.
- 

### **What skills you will learn**

- Advanced techniques in data pipeline development and automation.
  - Best practices in data governance and quality assurance.
  - Enhanced proficiency in cloud-based data platforms and modern reporting tools.
  - Cross-functional collaboration and stakeholder engagement.
  - Documentation and maintenance of scalable reporting systems.
- 

### **About VOIS**

VOIS (Vodafone Intelligent Solutions) is a strategic arm of Vodafone Group Plc, creating value and enhancing quality and efficiency across 28 countries, and operating from 7 locations: Albania, Egypt, Hungary, India, Romania, Spain and the UK.

Over 29,000 highly skilled individuals are dedicated to being Vodafone Group's partner of choice for talent, technology, and transformation. We deliver the best services across IT, Business Intelligence Services, Customer Operations, Business Operations, HR, Finance, Supply Chain, HR Operations, and many more.

Established in 2006, VOIS has evolved into a global, multi-functional organisation, a Centre of Excellence for Intelligent Solutions focused on adding value and delivering business outcomes for Vodafone.
